Our Company

VINTAGE Oil, Gas and Energy provides oil and natural gas exploration and other allied services in South Africa. Its core services include seismic data acquisition, processing, and interpretation; deep and directional drilling; workover; pipeline construction; and reservoir data acquisition.

The company also offers specialised services, such as cementing, stimulation, logging, well testing, directional drilling, mud engineering and logging, and integrated services for coal bed methane. In addition, it offers offshore drilling, and gas compression and allied services; and generates solar power.

“We are an energy company working to build a future where everyone can access energy resources efficiently and sustainably. Our work is based on passion and innovation, on our unique strengths and skills, on the quality of our people and in recognising that diversity across all aspects of our operations and organisation is something to be cherished.”

Our aim is to create long-term sustainable value. While we promote growth, efficiency and the prevention and management of business risks, we consider the interests of all those who work with us. Our business model has provided us with an excellent strategic position and marked competitive advantages.

Affiliations & Accreditations

Our Expertise

- Seismic data acquisition, processing, and interpretation
- Deep and directional drilling
- Workover
- Pipeline construction
- Reservoir data acquisition
- Generates solar power

Why we stand OUT ?

Design

- Cost Estimation
- Architectural Design
- Technology

Engineering

- Safety Planning
- Planning & Scheduling

Procurement

- Contracts Management
- Raw Material Purchase
- Vendor Sourcing
- Quality Control
- Storage Controls

Operation & Maintenance

- Facility Maintenance
- Plant Maintenance

Commissioning

- Trail Runs
- Quality Checks
- Safety Protocols
- Certifications

Contribution to Renewable Energy

VINTAGE ENERGY - is stepping ahead in renewable energy, contributing to the society and environment by reducing the carbon footprint. Fossil fuels are becoming increasingly more expensive as they are gradually depleted. Every solar power system we install decreases the amount of fossil fuels needed to generate electricity, which in turn reduces the pollutants contributing to global warming.

VINTAGE ENERGY aims to utilise practical and innovative techniques in providing a source of affordable and inexhaustable clean energy for all citizens.
